

Northwest Cadence Hands on Lab: Testing with Test Professional 2010 and Visual Studio 2010 Ultimate

4 half-days Remote Offerings:

October 24-27, 2011

8:30am – 12:30pm PST

\$1,200 per student

December 5-8, 2011

8:30am – 12:30pm PST

\$1,200 per student

Target Audience:

Testers, Test Managers and Development Managers

By the end of the course, testers should be able to:

Testers should be able to start testing software with Microsoft Test Manager and TFS. Test Managers will have enough knowledge to manage testing activities with MTM and TFS. All participants should understand the workflow between developers and testers and understand the benefits of MTM and TFS. In addition, all participants will understand the reports generated by TFS relating to quality and be able to report on application quality on the Cube.

Course Schedule overview:

- End to End discussion of the application lifecycle using Visual Studio, Team Foundation Server and Microsoft Test Manager
- Features of the 2010 release with a focus on how these apply to testers
- Work Item Tracking
- Introduction to Automated Builds
- Creating & Managing Test Plans
- Creating & Managing Test Cases
- Executing manual tests
- Filing Bugs
