

Doing Application Lifecycle Management Right

You're Invited.

December 14, 2011 Bellevue, WA

Application Lifecycle Management brings together business, development, and test with repeatable processes for reliable deliveries.

[Register Here](#) to join Northwest Cadence for this in-person event!

Welcome Time: 9:30am
Start Time: 10:30am
End Time: 4:30pm

Visual Studio 2010 Ultimate provides the whole enchilada of tools your team needs to do ALM seamlessly:

- Track requirements and fit work items to your team's process with the right Process Template, out of the box or fully customized
- Trace work from inception through design, implementation and test with source control integration
- Prevent defects and preserve velocity with gated check-ins, build automation and architecture verification
- Test, test, test! Set up test plans; record, playback and quickly automate manual tests in multiple browsers; log and replay tests in exactly the environment where they occurred, eliminating "no-repro" bugs; use test impact analysis to prioritize regression tasks
- Drive process improvement with customizable reporting and dashboards
- ... and much, much more!

Everyone is welcome! Please forward this to a co-worker or colleague you think would benefit from attending. [Register for this free event today!](#)

**** Notice to all U.S. government employees (including Military and Public Education personnel).** Due to applicable government gift and ethics rules, Northwest Cadence and Microsoft cannot provide government employees with "giveaways" or other items of value. In an effort to comply with these rules, our Public Sector attendees must pay for lunch in advance. Please visit <http://alaskapublicsectorlunch.eventbrite.com/> to purchase your lunch ticket. Please contact Amanda.jaworski@nwcadence.com with any questions or to receive additional information.
